

Natural Selection.

The dental industry has a way of favoring laboratories that have adapted to new technology. Those that have adapted ultimately ensure their success. At Zahn Dental, we have the catalyst that will ignite your laboratory's prosperity.

The Dental Wings Operating System (DWOS™) is a powerful application that aids the design of copings, full-contour anatomical wax-ups and implant abutments for the dental industry's leading manufacturers.

The open architecture of the DWOS™ is built to manufacturer specifications and powers scanners, milling machines and rapid prototyping systems, including:

- Dental Wings Scanner
- Noritake Katana
- Envisiontec Perfactory3®
- imagen™

The Dental Wings Scanner and the DWOS are exclusively distributed through Zahn Dental. Rely on us.

The Next Evolutionary Step.

Designing and manufacturing custom implants and abutments. It's the next evolutionary step for dental laboratories, and it starts with CMC and the powerful software of the Dental Wings Scanner.

- Powered by the DWOS™, an open-architecture platform
- Multi-system scanning jigs to identify type of implant system, corresponding thread pattern, rotation and the emergence profile angle
- Helps create incredibly precise fitting restorations, requiring no adjustment or polishing of the collar

Your laboratory partner on the cutting edge of CAD/CAM technology

Adaptation.

A successful dental laboratory adapts to the rapid advancements in the digital world and to changing dentists' requirements by creating a synthesis between technology and craftsmanship.

Porcelain restorations have proven to be a vital component to any dental practice. Noritake has produced exceptional porcelain for years and has developed innovative technology, creating a single solution. This fusion has created **ONE™ SOLUTION.**

A precision-milled Katana zirconia coping forms the foundation on which either Noritake CZR layered or CZR Press porcelain can be applied. It creates a restoration that is unmatched in the industry.

- Katana zirconia available in 9 pre-shaded blocks
- Creates the most natural opalescence of any all-ceramic restoration
- Displays incredible fracture resistance

Noritake

ONE™ SOLUTION. It's the logical choice for the best all-ceramic restorations.
